PROFESSIONAL EXPERIENCES

Software Developer
Cloud Panda Ph, Inc.
April 2018 – March 2019
  Was part of a team responsible in migrating projects to CodeIgniter and the development and maintenance of an Enterprise Resource Planning web application. Also actively participating in researching about ways to improve the quality of the projects in the company.

Project: PandaBooks
Technologies: HTML, CSS, MDBootstrap, Javascript, jQuery, PHP, CodeIgniter, Git, MySQL

Mobile Support Consultant
Yondu, Inc.
January 2020 – January 2021
  I was deployed to Sun Life PH and my main responsibilities were to investigate, support and fix production issues in Sun Life PH Client Portal Mobile and Web App. Performing health checks after deployments for multiple PH and HK applications and also provided some daily and weekly reports.

Projects: SLOCPI Client Portal and Mobile App, GoWell, SLGFI Client Portal, Advisor Mobile App, eDistribution Lazada, HK Client App, HK AHO

UI Developer
Yondu, Inc.
January 2021 – February 2022
  I was given the opportunity to be part of the HKCEP team as a Front-end Developer. I am tasked to develop the UI based from provided designs and integrate web services developed by back-end developers.

Projects: HK Client Mobile and Web App, HK Staff Portal

Mobile Analyst Programmer
Sun Life Asia Service Center
February 2022 – October 2022
  I am currently tasked with the continuous improvement and enhancements to Sun Life HK-based projects and also integrating Okta Authentication and SSO. As an acting frontend developer lead of a small squad, I am responsible to coordinate with other teams when it comes to frontend-related concerns. I am also extending my capabilities by involving myself in backend-related activities.

Projects: HK Client Mobile and Web App, HK Staff Portal

Software Developer
PageUp People Pte. Ltd.
October 2022 – Present
  I'm part of a front-end specialized team that's responsible for developing and maintaining an accessible, human-centered design system and component library using React and TypeScript (PageUp GEL), which was utilized internally by multiple teams across the organization. This system streamlined development processes, improved consistency, and ensured accessibility compliance.

ACHIEVEMENTS

Hack4PH 2018 [HackToWork Category Champion]
Department of Information and Communications Technology
November 23 – 26, 2018
  Hack4PH, is the 1st Philippine e-Government Innovation Challenge hosted by the Department of Information and Communication Technology. I was part of Team Sapantha and was responsible on the development of front-end of the mobile application.

Project: Work Panda
Technologies: Ionic Framework, Firebase, Leaflet
  Work Panda is mobile app that provides simple commuter strategies to beat the traffic & gives marketing opportunity to co-working spaces.

Flutter Philippines August 2020 UI Challenge (Participant)
Flutter Philippines
August, 2020
  An online challenge hosted by the Flutter Philippines with a theme of Food Delivery UI.

Project: Grab Food UI (Clone)
Technologies: Flutter
  A clone of the popular Grab app, but only for the Grab Food part. I'm continuing the development of the project even after the Challenge, so that I can further improve my Flutter development knowledge.

OBJECTIVE

Currently seeking for a mobile and web development opportunity in an I.T. company where I can utilize my knowledge and skills.
